For over 50 years, the National Sea Grant College Program (Sea Grant) has supported coastal and Great Lakes communities through research, extension and education. Sea Grant's mission is to enhance the practical use and conservation of coastal, marine and Great Lakes resources in order to create a sustainable economy and environment.

In 2016, a federal investment in Sea Grant of $74 million resulted in $611M economic benefit.

- **1,300** businesses created or sustained
- **7,100** jobs created or sustained
- **33** university-based programs
- **1,400,000** acres of habitat restored or protected
- **366,108** volunteer hours
- **1,099** training events provided to communities
- **781,164** K-12 students reached

**Research Extension Education**

Sea Grant Extension Agents are stationed in communities across the country to advance understanding of coastal and fisheries science for communities and economies that are more resilient.
Sea Grant work on healthy coastal ecosystems includes: research to understand ecosystem change and test new recovery techniques, monitoring and habitat restoration efforts with partners, citizen science programs, identifying and testing new methods to mitigate water pollution sources, and guidance and expertise on planning and management such as efforts by USC Sea Grant and partners to develop and use models to inform wetland restoration projects in southern California.

Sea Grant work on resilient communities and economies includes: long-term community planning, climate and ecological research, social science research to communicate more effectively, increasing access to existing tools, helping communities identify needs and solutions, and storm recovery including work by Texas Sea Grant to get fishermen back to work following Hurricane Harvey.

Sea Grant work on sustainable fisheries and aquaculture includes: advancing aquaculture through research and informing regulation, sustaining wild fisheries through research to test new catch strategies, listening and responding to needs of fishing communities, and training young fishermen such as through the Young Fishermen’s Summit organized by Alaska Sea Grant.

Sea Grant work to advance environmental literacy and workforce development includes: fellowship opportunities, on-the-job training, support for undergraduate and graduate research, experiential education programs, educational tourism programs, and teacher training workshops such as the one offered by Delaware Sea Grant in summer 2017.
