For over 50 years, the National Sea Grant College Program (Sea Grant) has trained the nation’s top graduate students in coastal science, policy, and related fields. Sea Grant graduate fellows have built a legacy of research that has advanced understanding of coastal resources and communities and helped to preserve vulnerable coastal ecosystems and economies.

In 2017 alone, Sea Grant supported

850 UNDERGRADUATE STUDENTS

960 GRADUATE STUDENTS

John A. Knauss Marine Policy Fellowship

Since 1979, Sea Grant has launched the professional careers of nearly 1,300 individuals through one of the nation’s most prestigious marine policy fellowship programs. The Knauss fellowship provides a unique educational and professional experience to graduate students who have an interest in ocean, coastal and Great Lakes resources and policy decisions affecting those resources. The program matches fellows with “hosts” in the legislative and executive branches of government for a one-year paid immersive policy experience in the Washington, D.C. area.

National Marine Fisheries Service - Sea Grant Joint Fellowship

Since 1990, NOAA’s National Marine Fisheries Service (NMFS) and Sea Grant have partnered to encourage qualified applicants to pursue careers in population and ecosystem dynamics and marine resource economics. The fellowship provides two to three years of funding, access to NMFS scientist mentors, and an annual symposium for fellows and NOAA fisheries professionals to exchange ideas and advance related scientific and management fields of study.

50% of alumni work in the federal government

95% of alumni remain in their field after graduation
