Stories of Resilience from Oregon's Fishing Community

Oregon Sea Grant recently released Fishing Community Resilience, a series of three, short, interdependent videos that detail what it's like living and working in the Oregon commercial fishing community. Dr. Flaxen Conway led the creation of this series from oral history research that started in mid 2010 and collected over 50 interviews. From Flaxen: "The series is a montage of individual, eloquent voices and images that weave together the components of fishing community resilience: connection, bravery, perseverance, cooperation, passion, lifelong learning, innovation, leadership, independence, and adaptation."

Hawai'i Sea Grant Research Informs Decision by U.S. Supreme Court to Protect Deep Water from Pollution

In response to concerns over the health of Maui's coral reefs, Hawai'i Sea Grant funded research from 2009-2016 to evaluate how sources of nutrients in groundwater are related to land use. The results conclusively showed that millions of gallons per day of deeply injected treated sewage effluent were being added to Maui's adjacent ocean waters. These findings were essential to informing an April 2020 U.S. Supreme Court ruling which clarified that underground water connections to surface waters are covered by the Clean Water Act.

Connections and Partner Updates

Survey on Reusable Bag use During COVID-19 Pandemic Ohio Sea Grant Extension educator Jill Bartolotta is conducting a short survey about the use of reusable bags during the COVID-19 pandemic. The survey will take no more than 10 minutes to complete. Participants must be 18 years or older. Please share widely.

Sea Grant Oil Spill Science Outreach Team Webinars The Sea Grant Oil Spill Science Outreach Team is developing a series of short webinars. Join us on June 8 at 3 pm CT for the first installment of the webinar series: Impacts of oil spills on air quality. Participants will learn about research on human exposure to airborne chemicals from oil spills including how in situ burns are monitored and how this information can inform oil spill response. We will send online access information via email to pre-registered participants. To learn more about this event or register click here.

NIST Job Opportunity The National Institute of Standards and Technology seeks a social scientist working in the areas of emergency communication and protective action. The individual will directly support the NIST Hurricane Maria Technical Investigation. Vacancy closes on June 9, 2020. More information available here.

American Flood Coalition's New Funding Guide The American Flood Coalition recently published a funding guide on federal resilience programs for small cities. This guide is intended to be a resource for local leaders exploring federal funding opportunities for flooding projects in small municipalities. Click here to view the guide.
