Executive Summary

Federal Agency Name

OAR National Sea Grant College Program (SG)

Funding Opportunity Title

FY2024 Sea Grant Programs Only - FY2024 Aquaculture Technologies and Education Travel Grants

Announcement Type

Competitive

Funding Opportunity Number

NOAA-OAR-SG-2024-24700

Assistance Listing Number(s)

11.417

Dates

Full applications due March 20, 2024

Period of Performance: Projects should have a start date no earlier than September 1, 2024 and an end date of no later than August 31, 2025.

Funding Opportunity Description

The National Sea Grant College Program was enacted by the U.S. Congress in 1966 (amended in 2020, Public Law 116-221) to support leveraged federal and state partnerships that harness the intellectual capacity of the nation's universities and research institutions to solve problems and generate opportunities in coastal communities.

Subject to the availability of funding, the National Sea Grant Office (NSGO) anticipates that up to \$500,000 in FY 2024 federal funds will be available to Sea Grant programs to support approximately 10-20 projects for a duration of up to one year. Awards will be made for no more than \$50,000 in federal funds per project. Proposals are sought that provide an opportunity for researchers (faculty, graduate students, post-doctoral), Sea Grant extension personnel, and industry members, or a mixture of participants, to enhance knowledge of aquaculture technologies, production practices and systems, and associated topics pertinent to the species or species group of interest to participants. The goal of this opportunity is that participants will utilize the knowledge and expertise gained through their travel experiences in their approach to improve aquaculture research, extension, or aquaculture production and/or business activities that will benefit the U.S. aquaculture industry. Available funding can be used to support travel costs, salary, and costs associated with outreach activities following travel. Travel must be focused on visiting aquaculture sites or facilities, either public or private. Funding for research activities is not permitted through this announcement. Successful applications will: identify, justify, and describe the need or needs to be addressed regarding improvement of aquaculture research, extension, or production activities, describe and document the proposed plan regarding how the proposed travel activities will address the identified need or needs, describe how the proposed activities will enhance aquaculture-related activities of project participants, and describe how the proposed activities will benefit the U.S. aquaculture industry and associated stakeholders. Applications require the standard 50% non-federal match for Sea Grant projects. Please note that it is envisioned that this funding opportunity, with potential variation in total funding available, will be reinstated annually, contingent on available funding. These investments are consistent with Sea Grant's focus area of Sustainable Fisheries and Aquaculture (SFA) and the Sea Grant Network's 10-year Aquaculture Vision, and support NOAA and Department of Commerce aquaculture goals.

This competition is open to all Sea Grant Programs. A Sea Grant Program may submit more than one application. Programs are encouraged to partner with other Sea Grant Programs and/or other entities such as individuals, State and Tribal Agencies/Organizations, HBCUs/MSIs, NGOs, aquaculture industry members and associations, universities, and colleges (including community colleges). Federal agencies and their personnel are not permitted to receive federal funding under this competition; however, federal scientists and other employees can serve as uncompensated partners or co-Principal Investigators on applications. Federal labs and offices can also make available specialized expertise, facilities or equipment to applicants but cannot be compensated under this competition for their use, nor can the value of such assets be used as match. International travel is permitted, however international travel must conform to guidelines specified by the [Fly America Act](#).

This document sets out requirements for submitting to NOAA-OAR-SG-2024-24700.

Full Text of Announcement

I. Funding Opportunity Description

A. Program Objective

NOAA provides funding to Sea Grant institutions to increase the understanding, assessment, development, management, utilization, and conservation of the Nation's ocean, coastal, and Great Lakes resources by providing assistance to promote a strong educational base, responsive research and training activities, broad and prompt dissemination of knowledge and techniques, and multidisciplinary approaches to environmental problems, in accordance with 33 USC 1121(b).

The U.S. has an opportunity to sustainably increase aquaculture production in marine systems (ocean, coastal, and Great Lakes) while increasing the economic resilience and nutritional security of communities across the country. Farming of finfish, shellfish, sea vegetables/algae, and other aquaculture provides great potential in the U.S. for increasing the supply of ocean and Great Lakes-sourced products while supporting and growing rural and coastal communities and economies. This opportunity has been developed as a means to support travel to expose applicants to aquaculture sites domestically or abroad to enhance the knowledge and experience of participants regarding aquaculture methods and technologies.

This competition ("FY 24 Aquaculture Technologies and Education Travel Grants," NOFO number: NOAA-OAR-SG-2022-2007053) focuses on projects that support travel opportunities for researchers (faculty, graduate students, post-doctoral), Sea Grant extension personnel, and industry members, or a mixture of participants, to enhance knowledge of aquaculture technologies, production practices and systems, and associated topics pertinent to the species or species group of interest to participants. Successful applications will: identify, justify, and describe the need or needs to be addressed regarding improvement of aquaculture research, extension, or production and/or business activities; describe and document the proposed plan regarding how the proposed travel activities will address the identified need or needs; describe how the proposed activities will enhance aquaculture-related activities of project participants; describe how the proposed activities will benefit the U.S. aquaculture industry and associated stakeholders; and demonstrate a plan to extend the improved approach (techniques, methods, practices, operations) to benefit the U.S. aquaculture industry. Engagement with, and support of faculty and students, through partnerships with HBCUs, MSIs, and other underserved institutions and entities, including aquaculture industry members, is encouraged. Available funding can be used to support travel costs, and salary and costs associated with outreach activities. Travel must be focused on visiting aquaculture sites or facilities, either public or private. Funding for research activities is not permitted through this announcement. Strong applications will address program priorities described below. Principal investigators and/or project team members of proposals selected for funding will be required to participate in an annual National Sea Grant Aquaculture Symposium to be held at a future aquaculture meeting venue to share results of work conducted.

B. Program Priorities

In FY 2023, the National Sea Grant Office (NSGO) established the Aquaculture Technologies and Education Travel Grants competition to support travel by various members of the U.S. aquaculture community (e.g. researchers, extension personnel, aquaculture industry members, etc.) to aquaculture related sites and facilities domestically and abroad. As envisioned, this competition will enhance the knowledge and experience of participants regarding aquaculture methods and technologies.

This competition is focused on funding projects that will support travel for one or more individuals to domestic or international aquaculture facilities or sites to facilitate enhancing the knowledge exchange and expertise of coastal, Great Lakes, or marine-focused aquaculture. Travel opportunities should enhance the knowledge of participants to aquaculture technologies, production practices and systems, and associated topics pertinent to the species or species group of interest to participants. The goal of this opportunity is that participants will utilize the knowledge and expertise gained through travel experiences in their approach to improve aquaculture research, extension, or aquaculture production activities that will benefit the U.S. aquaculture industry.

Successful proposals will:

- Identify, justify, and describe the need or needs to be addressed regarding improvement of aquaculture research, extension, or production and/or business activities
- Describe and document the proposed plan regarding how the proposed travel activities will address the identified need or needs
- Describe how the proposed activities will enhance aquaculture-related activities of project participants
- Describe how the proposed activities will benefit the U.S. aquaculture industry and associated stakeholders and demonstrate a plan to extend the improved approach (techniques, methods, practices, operations) to benefit the U.S. aquaculture industry
- Have the documented support from travel hosts

Engagement with, and support of faculty and students, through partnerships with HBCUs, MSIs, and other underserved institutions and entities, including aquaculture industry members, is encouraged.

The above criteria should lead to the selection of proposals that: 1) enhance the knowledge and expertise of participants with respect to aquaculture methods and technologies; 2) demonstrate that the activities proposed will meaningfully benefit the U.S. aquaculture industry and associated stakeholders; and 3) demonstrate a plan to ensure that results of the project are disseminated to the U.S. aquaculture community, as well as, the general public.

C. Program Authority

Statutory authority for this program is provided under the National Sea Grant College Program Act of 1966, as amended (33 USC 1121 et seq.).

II. Award Information

A. Funding Availability

Subject to the availability of funding, this announcement describes how eligible applicants should apply for FY2024 Sea Grant Programs Only - Aquaculture Technologies and Education Travel Grants. The National Sea Grant Office (NSGO) anticipates up to \$500,000 to support approximately 10-20 projects for a duration of up to one year. Each award will be no greater than \$50,000. Applications require the standard 50% non-federal match for Sea Grant projects. Available funding can be used to support travel costs, salary, and costs associated with outreach activities following travel. Travel must be focused on visiting aquaculture sites or facilities, either public or private. Funding for research activities is not permitted through this announcement.

There is no guarantee that funds will be available to make awards, or that any application will be selected for funding. If an applicant incurs any costs prior to receiving an award agreement signed by an authorized NOAA official, it does so at its own risk of not being selected or of these costs not being included in a subsequent award. NOAA and DOC will not be responsible for any incurred project costs if a project fails to receive full funding.

B. Project/Award Period

The anticipated start date is September 1, 2024, with projects to be completed by August 31, 2025.

Pre-award spending may be authorized 90 days prior to the start date of the award.

C. Type of Funding Instrument

The funding instrument is a cooperative agreement to an eligible institution. A cooperative agreement is used when substantial involvement of the federal government during the performance of the proposed work is anticipated. The nature of the substantial involvement includes strategic engagement with the National Sea Grant Aquaculture Team, support from National Sea Grant communication efforts, and participation in a National Sea Grant Aquaculture Symposium.

III. Eligibility Information

A. Eligible Applicants

The following entities are eligible to submit to this opportunity: Sea Grant College Programs, Sea Grant Institutional Programs, Sea Grant Coherent Area Programs, the National Sea Grant Law Center, and the National Sea Grant Library. For the remainder of this document, these entities are collectively referred to as “Sea Grant Programs”. Programs are encouraged to partner with other Sea Grant Programs and/or other entities such as individuals, State and Tribal Agencies/Organizations, HBCUs/MSIs, NGOs, aquaculture industry members and associations, universities, and colleges, including community colleges. International travel must adhere to federal and university-specific international travel policies as well as the [Fly America Act](#). Federal agencies and their personnel are not permitted to receive federal funding (including funding for travel) under this competition.

The National Sea Grant College Program champions diversity, equity, and inclusion (DEI) by recruiting, retaining, and preparing a diverse workforce, and proactively engaging and serving the diverse populations of coastal communities. Sea Grant is committed to building inclusive research, extension, communication, and education programs that serve people with unique backgrounds, circumstances, needs, perspectives, and ways of thinking. We encourage Sea Grant program applications to reflect diverse participation with regards to age, race, ethnicities, national origins, gender identities, sexual orientations, disabilities, cultures, religions, citizenship types, marital statuses, education levels, job classifications, veteran status types, income, and socioeconomic status.

B. Cost Share or Matching Requirement

Non-federal matching funds equal to at least 50 percent of the federal funding request must be provided unless a waiver justified by statute is granted, such as the waiver for insular areas granted by the Department of Commerce pursuant to 48 U.S.C. 1469a. If you believe your application may qualify for a waiver, please contact the National Sea Grant Office before submission to discuss it. The cumulative match at the end of each year of the grant must not fall below 50 percent of the cumulative federal request up to that point. In-kind contributions directly supporting this application may count towards this matching requirement.

C. Other Criteria that Affect Eligibility

IV. Application and Submission Information

A. Address to Request Application Package

Application packages are available online and can be downloaded from www.grants.gov under opportunity NOAA-OAR-SG-2024-24700. If an eligible applicant does not have access to the internet, please contact the Agency Contacts listed in Section VII for submission instructions.

B. Content and Form of Application

This section provides an overview of these required proposal elements (and where to locate them). Applications must adhere to the provisions under "Required Elements" below. Failure to adhere to these provisions may result in a delay in award processing or rejection of the application, based on the extent of the noncompliance.

The submitting Sea Grant program must redact all Personally Identifiable Information (PII) in the application materials prior to final submission to grants.gov. PII that must be redacted from the application includes, but is not limited to, social security number, date of birth, student identification number (from transcripts) or other information which if lost, compromised, or disclosed without authorization, could result in harm, embarrassment, inconvenience, or unfairness to an individual.

IMPORTANT NOTE: This proposal package will be using a different set of forms than Sea Grant programs have completed in the past. Instead of the “SF424 NOAA Standard Non-Construction Application Package” of forms, this application will include the “SF424 NOAA Research & Related (R&R) Forms Package.” **While many of the forms may be familiar, please pay special attention to the headings and instructions in this section.**

Required Elements:

Applications must include the following elements. Failure to adhere to these provisions may result in a delay in award processing or rejection of the application, based on the extent of the noncompliance.

Full Proposal Required Elements

(please also see VIII. Other Information for additional post-application required elements for submission):

1. Research & Related Senior/Key Person Profile Form (Grants.gov, OMB Control No. 4040-0001)

This form must be completed and include a profile for the Principal Investigator and any co-PI(s). CVs and Current and Pending Support for each person’s profile will also be attached to this form. The first listed PD/PI on the application must include their eRA Commons ID in the “Credential, e.g., agency login” field of form. Failure to register in eRA Commons and to include a valid PD/PI Commons ID in the Applicant Identifier field will prevent the successful submission of an electronic application.

Additional personnel included on the form do not need to include this information, however eRA will create a warning recommending those personnel also have valid eRA Commons IDs. Again - it is not required that those additional personnel include valid eRA Commons IDs regardless of the warnings created by the eRA system.

2. Research and Related Budget Form

The Research and Related Budget is a single form that will need to be completed covering the entire award by budget period following the instructions from Grants.gov. At the end of the Research and Related Budget form, “Section L” provides space for one attachment titled, “Budget Justification.” The budget narrative for the project must be attached there. The budget narrative should explain the budget items by object class category (both federal and non-federal/match) in sufficient detail to enable review of the appropriateness of the funding requested. Additional budget narrative guidance can be found at: [NOAA Grants Management Division's Budget Narrative Guidance](#)

3. Research & Related Other Project Information Form (Grants.gov, OMB Control No. 4040-0001)

This form must be completed for the application, and should also be used to attach the Project Abstract Summary Form, the Project Narrative, Bibliography & References Cited (if applicable), and any other relevant forms or information as applicable. See form-specific instructions available on Grants.gov for additional instructions as needed.

a. Project Summary/Abstract Attachment

This attachment should be the completed **Project Abstract Summary Form (Grants.gov, OMB Control No. 4040-0019)** that is available as part of the application package. Using 4,000 characters or less, the Project Abstract should provide an overview of the application. Ensure the Project Abstract succinctly describes the project in plain language that the public can understand and use without the full proposal. It should be a self-contained description of the application and should contain a general statement of objectives and methods to be employed. It should be informative to other persons working in the same or related fields and understandable to a technically literate lay reader. Do not include personally identifiable, sensitive or proprietary/confidential information. This project abstract information (as submitted) will be made available on public websites and/or databases including USAspending.gov.

Project Abstract Elements:

- Use the following format:
 - Purpose:
 - Activities to be performed:
 - Expected Outcomes:
 - Intended Beneficiaries:
 - Subrecipient Activities:
- Keep it short. In most cases, each element above should be a couple of sentences to a paragraph in length.
- DO NOT repeat the Proposal Title. The Proposal Title is always presented with the Project Description, so including it in the abstract is not necessary.
- Include a high quality description that includes specificity regarding the purpose of the project. Characteristics of strong abstracts include a plain language description of the purpose for the project (which may include specific performance goals, indicators, milestones, or expected outcomes of the project), activities to be performed, deliverables and expected outcomes, intended beneficiary or recipient.
- Keep it simple. Do not use abbreviations, acronyms, technical terminology, or agency-specific terms. The intended audience is Congress and the general public, not specific interested parties and/or federal employees. The education level of the reader should be assumed to be the fifth grade of elementary school. Even those who are highly educated will appreciate a simply written document when they have hundreds of projects to review in one sitting.

b. Project Narrative Attachment

Full applications to this competition must be submitted to Grants.gov by 11:59 pm Eastern Time on **March 20, 2024**.

The project proposal narrative should clearly lay out the topical nature of the proposal, how it responds to the priorities of the competition, and how it will lay the foundation for future work. The proposal should also identify appropriate end user groups and demonstrate their involvement throughout the project. Applicants should budget travel to attend and participate in a National Sea Grant Aquaculture Symposium to be held at a future aquaculture meeting venue to share results of work conducted. Dates and location for the symposium will be announced annually by the National Sea Grant Office.

The total number of pages in the application description should not exceed five (5). The narrative format should use a 12-pt font with 1 inch margins. Applicants need not fill the entire 5-page maximum for the application description. Excess pages will not be included in the review. The title page and letters of support do not contribute to the page limit. The Project Proposal Narrative should include the following elements:

- Title page (not included in 5-page limit) including:
 - Proposal title
 - Listing of all project investigators with email addresses
 - Listing of collaborators/partners, including travel sites and hosts
 - Estimated budget of federal funds requested with matching funds
- Project background
 - Explain/describe the need or needs to be addressed during the proposed travel, regarding improvement of aquaculture research, extension, or production activities.
- Project objectives/details
 - List the project objectives and describe in detail the proposed travel activities (site(s) and contact(s) to be visited) and how the project will address the need or needs identified in the background.
 - **Applicants must include Letters of Support from travel hosts (letters do not contribute to the page limit).**
- Methods/Project details
 - Provide a detailed description of the methods used to address the project objectives
 - Include a timeline chart illustrating project activities and milestones
 - Explain how this project leverages the expertise of project partners
- Anticipated outcomes and deliverables including:
 - A description of how the project will advance aquaculture communications and aquaculture literacy to benefit the coastal, marine, or Great Lakes region aquaculture community, seafood consumers, and the general public businesses
- Outreach and technology transfer plan
 - Provide a description of expected outcomes and deliverables that will result from the project. Specifically, describe how the proposed activity will be of benefit to participants as well as the U.S. aquaculture industry. In addition, the proposal should include a description of outreach activities to ensure that project activities and project results are disseminated to the aquaculture community and other appropriate stakeholders, including the general public.
- Project timeline
 - Provide a timeline for accomplishing the proposed work, which covers the entire duration of the project. Include approximate dates for key milestones related to the proposed work, including the accomplishment of anticipated outcomes and deliverables.
- Applicants submitting proposals that involve the use of human test subjects should state so clearly in their application. These proposed research activities require approval of the applicant's Institutional Review Board (IRB) before such research can proceed. Applicants are responsible for obtaining IRB approval from their institution and providing that documentation to NOAA once the approval is obtained and prior to any NOAA-funded human subject testing. Proposals intending to use human test subjects should specify clearly in the timeline approximately when IRB approval will be obtained and when the testing is expected to occur.
- Diversity statement

- NSGO recognizes it has a particular and unique opportunity to support NOAA’s commitment to diversity and inclusion by taking an intentional step that encourages applicants to consider diversity and inclusion as part of their scientific projects. This action has the potential to make an impact on not only the diversity and inclusion in science at NOAA, but also in the equity of services provided by NOAA. In this section, describe how the proposed activity incorporates the input of underserved groups (e.g., race/ethnicity, gender identities, sexual orientation, disability, geography, etc.) and how they benefit from its outcomes. Applicants are encouraged to review the resources and best practices compiled by NSGO related to diversity, equity, and inclusion in the Resources for Applicants & Reviewers section found here: <https://seagrant.noaa.gov/funding/>.
 - Letters of support confirming partnerships as listed in the proposal. **Please note that Letters of support from travel hosts are required.** Letters of support do not count against the page limit).
 - Other letters of support (as relevant, not required, do not count against the page limit)
- c. *Bibliography & References Cited Attachment (if applicable)***

If applicable, provide a bibliography of any references cited in the Project Narrative. Each reference must include the names of all authors (in the same sequence in which they appear in the publication), the article and journal title, book title, volume number, page numbers, and year of publication. Include only bibliographic citations. Applicants should be especially careful to follow scholarly practices in providing citations for source materials relied upon when preparing any section of the application.

d. *Other Attachments*

Abbreviated Environmental Compliance Questionnaire (OMB Control No. 0648-0538)

This announcement is not seeking proposals that will have an environmental impact. Therefore, a NEPA Questionnaire is not required as part of the proposal.

4. Additional Application Package Forms

In addition to the forms required above, standard federal forms and assurances are required and can be found with the application package on Grants.gov. These include:

a. *SF-424 R&R Form* (*Grants.gov, OMB Control No. 4040-0001*)

This form, titled “Application for Federal Assistance,” must identify the entire funding period, as well as the federal funding amount being requested by the applicant and any non-federal matching fund amount. The form must be completed with the institution’s accurate EIN and DUNS and point of contact, and signed by the institution’s authorized representative or designee. Total federal and non-federal amounts listed in the SF-424 R&R, the Cumulative Budget of the Research and Related Budget form, and budget narrative must be the same.

b. *SF-424B Assurances* (*Grants.gov, OMB Control No. 4040-0007*)

The form, titled “Assurances – Non-Construction Programs,” must be completed and signed by the institution's authorized representative or designee.

c. *CD-511* (*Grants.gov, US DOC*)

The form, titled “Certification Regarding Lobbying,” must be completed and signed by the institution’s authorized representative or designee.

d. *SF-LLL* (*Grants.gov, OMB Control No. 0348-0046*) - *optional form, include if appropriate*

This form, titled “Disclosure of Lobbying Activities,” is an optional form and should be included if appropriate. If included, it must be completed and signed by the institution’s authorized representative or designee.

This announcement is not seeking proposals that generate environmental data. Therefore, a Data Management Plan is not required as part of the Proposal.

C. Unique entity identifier and System for Award Management (SAM)

Each applicant (unless the applicant is an individual or Federal awarding agency that is excepted from those requirements under 2 CFR 25.110(b) or (c), or has an exception approved by the Federal awarding agency under 2 CFR 25.110(d)) is required to: (i) Be registered in SAM before submitting its application; (ii) Provide a valid unique entity identifier (UEI) in its application; and (iii) Continue to maintain an active SAM registration with current information at all times during which it has an active Federal award or an application or plan under consideration by a Federal awarding agency. NOAA may not make a Federal award to an applicant until the applicant has complied with all applicable unique entity identifier and SAM requirements and, if an applicant has not fully complied with the requirements by the time NOAA is ready to make a Federal award, NOAA may determine that the applicant is not qualified to receive a Federal award and use that determination as a basis for making a Federal award to another applicant.

D. Submission Dates and Times

Applications must be submitted to Grants.gov by 11:59 p.m. Eastern time on March 20, 2024.

Please note: validation or rejection of an application by Grants.gov may take up to two business days after submission. Eligible Sea Grant programs should consider this process in developing their submission timeline. For eligible applications submitted through Grants.gov, a date and time receipt indication is included and will be the basis of determining timeliness.

E. Intergovernmental Review

Applications under the National Sea Grant College Program are not subject to Executive Order 12372, "Intergovernmental Review of Federal Programs."

F. Funding Restrictions

The Sea Grant Act at 33 USC 1124(d)(2) states:

"No payment under any grant or contract under this section may be applied to:

(A) the purchase or rental of any land; or

(B) the purchase, rental, construction, preservation, or repair of any building, dock, or vessel; except that payment under any such grant or contract may be applied to the short-term rental of buildings or facilities for meetings which are in direct support of any Sea Grant Program or project and may, if approved by the Secretary, be applied to the purchase, rental, construction, preservation, or repair of non-self-propelled habitats, buoys, platforms, and other similar devices or structures, or to the rental of any research vessel which is used in direct support of activities under any Sea Grant Program or project."

G. Other Submission Requirements

Applicant organizations must complete and maintain three registrations to be eligible to apply for or receive an award. These registrations include SAM.gov, Grants.gov, and eRA Commons. All registrations must be completed prior to the application being submitted. The complete registration process for all three systems can take 4 to 6 weeks, so applicants should begin this activity as soon as possible. If an eligible applicant does not have access to the internet, please contact the Agency Contacts listed in Section VII for submission instructions.

Prior to registering with eRA Commons, applicant organizations must first obtain a Unique Entity Identifier (UEI) from SAM.gov, if needed (refer to Section IV. Applications and Submission Information, Section C). Organizations can register with eRA Commons in tandem with completing their full SAM and Grants.gov registrations; however, all registrations must be in place by time of application submission. eRA Commons requires organizations to identify at least one Signing Official (SO) and at least one Program Director/Principal Investigator (PD/PI) account in order to submit an application.

The first PD/PI listed on the application must include their eRA Commons ID in the "Credential, e.g. agency login" Applicant Identifier field on the SF424 form. Failure to register in the Commons and to include a valid PD/PI Commons ID in the Applicant Identifier field will prevent the successful submission of an electronic application.

V. Application Review Information

Evaluation Criteria

1. Importance/relevance and applicability of proposed projects to the program goals	Maximum Points: 0
This criterion ascertains whether there is intrinsic value in the proposed work and/or relevance to NOAA, federal, regional, state, or local activities.	
2. Technical/scientific merit	Maximum Points: 0
This criterion assesses whether the approach is technically sound and/or innovative, if the methods are appropriate, and whether there are clear project goals and objectives.	
3. Overall qualifications of applicants	Maximum Points: 0
his criterion ascertains whether the applicant possesses the necessary education, experience, training, facilities, and administrative resources to accomplish the project.	
4. Project costs	Maximum Points: 0
This criterion evaluates the budget to determine if it is realistic and commensurate with the project needs and time frame.	
5. Outreach and Education	Maximum Points: 0
This criterion assesses whether the project provides a focused and effective education and outreach strategy regarding NOAA's mission to protect the Nation's natural resources.	
Overall qualifications of applicants	Maximum Points: 10
This criterion ascertains whether the applicant(s) possesses the necessary education, experience, training, facilities (if applicable), and administrative resources to accomplish the project.	
Project Details	Maximum Points: 25
This criterion assesses whether the approach is sound and/or innovative, if proposed activities are appropriate and address a defined need or needs, and whether there are clear project goals and objectives. For the FY24 Aquaculture Technologies and Education Travel Grants program this includes:	
<ul style="list-style-type: none"> • A description of the goals and objectives of the proposal are clearly described, proposed travel activities (site(s) and contact(s) to be visited) are presented in detail, and a description of how the project will address the need or needs identified in the background. 	
Importance/relevance and applicability of proposed projects to the program goals	Maximum Points: 25
This criterion ascertains whether there is intrinsic value in the proposed work and/or relevance to NOAA, federal, regional, state, or local activities. For the FY24 Aquaculture Technologies and Education Travel Grants program, this includes:	
<ul style="list-style-type: none"> • A description of the need or needs to be addressed regarding improvement of aquaculture research, extension, or production activities. • A description of how the project will address the need or needs identified in the background. 	
Project costs	Maximum Points: 15
This criterion evaluates the budget to determine if it is realistic and commensurate with the proposed project activities, needs, and time frame.	
Outcomes and deliverables	Maximum Points: 25
This criterion assesses whether the project provides a clear description of anticipated outcomes and deliverables that will result from the project. For the FY24 Aquaculture Technologies and Education Travel Grants program, this includes:	
<ul style="list-style-type: none"> • A description of how the project will be of benefit to participants, as well as, the U.S. aquaculture industry. 	

- A description of outreach activities to ensure that project activities and project results are disseminated to the aquaculture community and other appropriate stakeholders, including the general public.

Review and Selection Process

Once a full proposal application has been received by NOAA, an initial administrative review is conducted to determine compliance with requirements and completeness of the application. Applications that are missing required elements listed in Section IV. B. above, or applications coming from ineligible applicants may be rejected without further review.

Applications that pass the administrative review will be reviewed by at least three independent reviewers drawn from experts in a range of disciplines that are relevant to the applications. Each proposal will receive at least three written reviews from the reviewers assessing its merits with regard to the evaluation criteria. These reviews will be averaged to produce a rank order. The selecting official shall award in the rank order unless the application is justified to be selected out of rank order based upon any of the selection factors provided in Section V.C. The selecting official shall make final recommendations for awards to the Grants Officer who is authorized to obligate the funds and execute the award.

The program manager, NEPA staff lead, or grants specialist may contact the applicants to discuss questions about the merit or administrative correctness of the application and may delay approval of the application, or impose conditions on the award preventing funding or execution of certain activities, until all questions are satisfactorily answered.

Selection Factors

The Selecting Official shall award in the rank order unless the proposal is justified to be selected out of rank order based on one or more of the following factors:

1. Availability of funding.
2. Balance/distribution of funds:
 - a. geographically
 - b. by type of institution
 - c. by type of partners
 - d. by research priority
 - e. by project types
3. Duplication of other projects funded or considered for funding by NOAA/Federal agencies.
4. Program priorities and policy factors.
5. Applicant's prior award performance.
6. Partnerships with/Participation of targeted groups.
7. Adequacy of information necessary for NOAA staff to make a NEPA determination and draft necessary documentation before recommendations for funding are made to the Grants Officer.

Consequently, awards may not necessarily be made to the highest-scored applications. Investigators may be asked to answer questions; and/or modify objectives, work plans, and/or budgets (including overall funding level) to address the issues raised by the reviewers, the competition manager, the Selecting Official, or the Grants Officer before an award is made. Subsequent administrative processing will be in accordance with current NOAA grants procedures.

Anticipated Announcement and Award Dates

Subject to the availability of funds, projects are expected to start September 1, 2024.

VI. Award Administration Information

A. Award Notices

PRE-AWARD COSTS. Per 2 CFR 200.458, NOAA authorizes award recipients to expend pre-award costs up to 90 days before the period of performance start date at the applicant's own risk without approval from NOAA and in accordance with the applicant's internal policies and procedures. Such costs are allowable only to the extent that they would have been allowable if incurred after the date of the Federal award. This does not include direct proposal costs (as defined at 2 CFR 200.460). In no event will NOAA or the Department of Commerce be responsible for direct proposal preparation costs. Pre-award costs will be a portion of, not in addition to, the approved total budget of the award. Pre-award costs expended more than 90 days prior to the period of performance start date require approval from the Grants Officer. This does not change the period of performance start date.

GRANTS OFFICER SIGNATURE. Proposals submitted in response to this solicitation are not considered awards until the Grants Officer has signed the grant agreement. Only Grants Officers can bind the Government to the expenditure of funds. The Grants Officer's digital signature constitutes an obligation of funds by the federal government and formal approval of the award.

LIMITATION OF LIABILITY. Funding for programs listed in this notice is contingent upon the availability of funds. Applicants are hereby given notice that funds may not have been appropriated yet for the programs listed in this notice. Publication of this announcement does not obligate NOAA to award any specific project or to obligate any available funds.

B. Administrative and National Policy Requirements

UNIFORM ADMINISTRATIVE REQUIREMENTS, COST PRINCIPLES, AND AUDIT

REQUIREMENTS. Through 2 C.F.R. § 1327.101, the Department of Commerce adopted Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards at 2 C.F.R. Part 200, which applies to awards in this program. Refer to <http://go.usa.gov/SBYh> and <http://go.usa.gov/SBg4>.

RESEARCH TERMS AND CONDITIONS. For awards designated on the CD-450 as Research, the Commerce Terms, and the Federal-wide Research Terms and Conditions (Research Terms) as implemented by the Department of Commerce, currently, at <https://www.nsf.gov/awards/managing/rtc.jsp>, both apply to the award. The Commerce Terms and the Research Terms are generally intended to harmonize with each other; however, where the Commerce Terms and the Research Terms differ in a Research award, the Research Terms prevail, unless otherwise indicated in a specific award condition.

DEPARTMENT OF COMMERCE PRE-AWARD NOTIFICATION REQUIREMENTS FOR GRANTS

AND COOPERATIVE AGREEMENTS. The Department of Commerce Pre-Award Notification Requirements for Grants and Cooperative Agreements contained in the Federal Register notice of December 30, 2014 (79 FR 78390) are applicable to this solicitation and may be accessed online at <http://www.gpo.gov/fdsys/pkg/FR-2014-12-30/pdf/2014-30297.pdf>.

DEPARTMENT OF COMMERCE (DOC) TERMS AND CONDITIONS. Successful applicants who accept a NOAA award under this solicitation will be bound by the DOC Financial Assistance Standard Terms and Conditions. This document will be provided in the award package in eRA at <http://www.ago.noaa.gov> and at <https://www.commerce.gov/oam/policy/financial-assistance-policy>.

BUREAU TERMS AND CONDITIONS. Successful applicants who accept an award under this solicitation will be bound by bureau-specific standard terms and conditions. These terms and conditions will be provided in the award package. For NOAA awards only, the Administrative Standard Award Conditions for National Oceanic and Atmospheric Administration (NOAA) Financial Assistance Awards U.S. Department of Commerce are applicable to this solicitation and may be accessed online at <https://www.noaa.gov/organization/acquisition-grants/financial-assistance>

NATIONAL ENVIRONMENTAL POLICY ACT (NEPA). NOAA must analyze the potential environmental impacts, as required by the National Environmental Policy Act (NEPA), for applicant projects or proposals which are seeking NOAA federal funding opportunities. Detailed information on NOAA compliance with NEPA can be found at the following NOAA NEPA website: <http://www.nepa.noaa.gov/>, including our NOAA Administrative Order 216-6 for NEPA, http://www.nepa.noaa.gov/NAO216_6.pdf, and the Council on Environmental Quality implementation regulations, http://energy.gov/sites/prod/files/NEPA-40CFR1500_1508.pdf. Consequently, as part of an applicant's package, and under their description of their program activities, applicants are required to provide detailed information on the activities to be conducted, locations, sites, species and habitat to be affected, possible construction activities, and any environmental concerns that may exist (e.g., the use and disposal of hazardous or toxic chemicals, introduction of non- indigenous species, impacts to endangered and threatened species, aquaculture projects, and impacts to coral reef systems). In addition to providing specific information that will serve as the basis for any required impact analyses, applicants may also be requested to assist NOAA in drafting an environmental assessment, if NOAA determines an assessment is required. Applicants will also be required to cooperate with NOAA in identifying feasible measures to reduce or avoid any identified adverse environmental impacts of their proposal. Failure to do so shall be grounds for not selecting an application. In some cases if additional information is required after an application is selected, funds can be withheld by the Grants Officer under a special award condition requiring the recipient to submit additional environmental compliance information sufficient to enable NOAA to make an assessment on any impacts that a project may have on the environment.

FREEDOM OF INFORMATION ACT. Department of Commerce regulations implementing the Freedom of Information Act (FOIA), 5 U.S.C. Sec. 552, are found at 15 C.F.R. Part 4, Public Information. These regulations set forth rules for the Department regarding making requested materials, information, and records publicly available under the FOIA. Applications submitted in response to this Notice of Funding Opportunity may be subject to requests for release under the Act. In the event that an application contains information or data that the applicant deems to be confidential commercial information that should be exempt from disclosure under FOIA, that information should be identified, bracketed, and marked as Privileged, Confidential, Commercial or Financial Information. In accordance with 15 CFR § 4.9, the Department of Commerce will protect from disclosure confidential business information contained in financial assistance applications and other documentation provided by applicants to the extent permitted by law.

MINORITY SERVING INSTITUTIONS. The Department of Commerce/National Oceanic and Atmospheric Administration (DOC/NOAA) is strongly committed to increasing the participation of Minority Serving Institutions (MSIs), i.e., Historically Black Colleges and Universities, Hispanic-serving institutions, Tribal colleges and universities, Alaskan Native and Native Hawaiian institutions, and institutions that work in underserved communities.

DATA SHARING PLAN. 1. Environmental data and information collected or created under NOAA grants or cooperative agreements must be made discoverable by and accessible to the general public, in a timely fashion (typically within two years), free of charge or at no more than the cost of reproduction, unless an exemption is granted by the NOAA Program. Data should be available in at least one machine-readable format, preferably a widely-used or open-standard format, and should also be accompanied by machine-readable documentation (metadata), preferably based on widely used or international standards. 2. Proposals submitted in response to this Announcement must include a Data Management Plan of up to two pages describing how these requirements will be satisfied. The Data Management Plan should be aligned with the Data Management Guidance provided by NOAA in the Announcement. The contents of the Data Management Plan (or absence thereof), and past performance regarding such plans, will be considered as part of proposal review. A typical plan should include descriptions of the types of environmental data and information expected to be created during the course of the project; the tentative date by which data will be shared; the standards to be used for data/metadata format and content; methods for providing data access; approximate total volume of data to be collected; and prior experience in making such data accessible. The costs of data preparation, accessibility, or archiving may be included in the proposal budget unless otherwise stated in the Guidance. Accepted submission of data to the NOAA National Centers for Environmental Information (NCEI) is one way to satisfy data sharing requirements; however, NCEI is not obligated to accept all submissions and may charge a fee, particularly for large or unusual datasets. 3. NOAA may, at its own discretion, make publicly visible the Data Management Plan from funded proposals, or use information from the Data Management Plan to produce a formal metadata record and include that metadata in a Catalog to indicate the pending availability of new data. 4. Proposal submitters are hereby advised that the final pre-publication manuscripts of scholarly articles produced entirely or primarily with NOAA funding will be required to be submitted to NOAA Institutional Repository after acceptance, and no later than upon publication. Such manuscripts shall be made publicly available by NOAA one year after publication by the journal.

More information can be found on NOAA's Data Management Procedures at:

https://nosc.noaa.gov/EDMC/documents/Data_Sharing_Directive_v3.0_remediated.pdf and at NAO 212-15 Management of Environmental Data and Information:

<https://www.noaa.gov/organization/administration/nao-212-15-management-of-environmental-data-and-information>

SCIENCE INTEGRITY. 1. Maintaining Integrity. The non-Federal entity shall maintain the scientific integrity of research performed pursuant to this grant or financial assistance award including the prevention, detection, and remediation of any allegations regarding the violation of scientific integrity or scientific and research misconduct, and the conduct of inquiries, investigations, and adjudications of allegations of violations of scientific integrity or scientific and research misconduct. All the requirements of this provision flow down to subrecipients. 2. Peer Review. The peer review of the results of scientific activities under a NOAA grant, financial assistance award or cooperative agreement shall be accomplished to ensure consistency with NOAA standards on quality, relevance, scientific integrity, reproducibility, transparency, and performance. NOAA will ensure that peer review of "influential scientific information" or "highly influential scientific assessments" is conducted in accordance with the Office of Management and Budget (OMB) Final Information Quality Bulletin for Peer Review and NOAA policies on peer review, such as the Information Quality Guidelines. 3. In performing or presenting the results of scientific activities under the NOAA grant, financial assistance award, or cooperative agreement and in responding to allegations regarding the violation of scientific integrity or scientific and research misconduct, the non-Federal entity and all subrecipients shall comply with the provisions herein and NOAA Administrative Order (NAO) 202-735D, Scientific Integrity, and its Procedural Handbook, including any amendments thereto. That Order can be found at <http://nrc.noaa.gov/ScientificIntegrityCommons.aspx>. 4. Primary Responsibility. The non-Federal entity shall have the primary responsibility to prevent, detect, and investigate allegations of a violation of scientific integrity or scientific and research misconduct. Unless otherwise instructed by the grants officer, the non-Federal entity shall promptly conduct an initial inquiry into any allegation of such misconduct and may rely on its internal policies and procedures, as appropriate, to do so. 5. By executing this grant, financial assistance award, or cooperative agreement the non-Federal entity provides its assurance that it has established an administrative process for performing an inquiry, investigating, and reporting allegations of a violation of scientific integrity or scientific and research misconduct; and that it will comply with its own administrative process for performing an inquiry, investigation, and reporting of such misconduct. 6. The non-Federal entity shall insert this provision in all subawards at all tiers under this grant, financial assistance award, or cooperative agreement.

REVIEW OF RISK. After applications are proposed for funding by the Selecting Official, the Grants Office will perform administrative reviews, including an assessment of risk posed by the applicant under 2 C.F.R. 200.206. These may include assessments of the financial stability of an applicant and the quality of the applicant's management systems, history of performance, and the applicant's ability to effectively implement statutory, regulatory, or other requirements imposed on non-Federal entities. Special conditions that address any risks determined to exist may be applied. Applicants may submit comments about any information concerning organizational performance listed in the Responsibility/Qualification section of SAM.gov for consideration by the awarding agency.

REVIEWS AND EVALUATION. The applicant acknowledges and understands that information and data contained in applications for financial assistance, as well as information and data contained in financial, performance and other reports submitted by applicants, may be used by the Department of Commerce in conducting reviews and evaluations of its financial assistance programs. For this purpose, applicant information and data may be accessed, reviewed and evaluated by Department of Commerce employees, other Federal employees, and also by Federal agents and contractors, and/or by non-Federal personnel, all of whom enter into appropriate conflict of interest and confidentiality agreements covering the use of such information. As may be provided in the terms and conditions of a specific financial assistance award, applicants are expected to support program reviews and evaluations by submitting required financial and performance information and data in an accurate and timely manner, and by cooperating with the Department of Commerce and external program evaluators. In accordance with §200.303(e), applicants are reminded that they must take reasonable measures to safeguard protected personally identifiable information and other confidential or sensitive personal or business information created or obtained in connection with a Department of Commerce financial assistance award.

C. Reporting

In accordance with 2 CFR 200.328-9 and the terms and conditions of the award, financial reports are to be submitted semi-annually and performance (technical) reports are to be submitted semi-annually. Reports are submitted electronically through eRA.

The Federal Funding Accountability and Transparency Act, 31 U.S.C. 6101 note, includes a requirement for awardees of applicable Federal grants to report information about first-tier subawards and executive compensation under Federal assistance awards. All awardees of applicable grants and cooperative agreements are required to report to the FFATA Subaward Reporting System (FSRS) available at <https://www.fsrs.gov/> on all subawards over \$30,000. Refer to 2 CFR Part 170.

VII. Agency Contacts

The National Sea Grant Office mailing address is:
NOAA Sea Grant
1315 East-West Highway
Silver Spring, MD 20910

For questions about this competition, please contact Chuck Weirich or Mark Rath, National Sea Grant Office's aquaculture managers (oar.hq.sg.aquaculture@noaa.gov).

VIII. Other Information

Demographics Information

NOAA will not provide collected demographics information to reviewers for any purpose, including evaluation, and will not consider demographics information during selection.

Applicants must submit documentation by either including a statement within the application, or via email to sg.grants@noaa.gov, that they have responded to the new requirement to provide the following information for all named collaborators on the proposal. (2022, OMB approved for PRA under DOC generic clearance information collections, 0690-0030 and 0690-0035).

Note: Applicants may use their own method of collecting this information. The NSGO has also developed an [online form](#) as an optional method for collection. Submission to [this form](#) would count as fulfillment of this requirement.

1. Do you or your organization identify with any of the following groups that the federal government, in Executive Order 13985, has identified as underserved? List all that apply.

- a) Black
- b) Latino
- c) Indigenous and/or Native American
- d) Asian American
- e) Pacific Islander
- f) Other person of color
- g) Members of religious minorities
- h) Lesbian, gay, bisexual, transgender, and queer (LGBTQ+) persons
- i) Persons with disabilities
- j) Persons who live in rural areas
- k) Persons otherwise adversely affected by persistent poverty or inequality
- l) No, I do not identify with any of these groups

Sea Grant 90-2 Project Summary Form

Once applications have been recommended for funding, applicants must submit a Sea Grant 90-2 Project Summary Form (for each project within the application) through the [90-2 Webform portal](#), or as a PDF via e-mail to oar.hq.sg.aquaculture@noaa.gov. This is due within 30 calendar days after the applicant has been notified via email that their application has been recommended for award. A detailed step-by-step guide for completing the web-based 90-2 Form is available on [Inside Sea Grant](#). Once the project is approved and funded, that information will be publicly available and searchable on the [National Sea Grant College Program public website](#).

National Sea Grant Planning Implementation and Evaluation Reporting (PIER)

Recipients are required to use the National Sea Grant Planning Implementation and Evaluation Reporting (PIER) project database to communicate with the National Sea Grant Office on activities relating to this award. This includes tracking progress and impacts, in addition to performance metrics.

Section 508 Compliance

All public-facing products produced with funding from the award(s)/project(s) must ensure compliance with Section 508 of the Americans with Disabilities Act.

The grant application and final report of all funded grants are public documents, except for privileged information or material that is personal, proprietary or otherwise exempt from disclosure under law. Appropriate labeling in the application will aid identification of what may be specifically exempt. The applicant acknowledges and understands that information and data contained in applications for financial assistance, as well as information and data contained in financial, performance and other reports submitted by applicants, may be used by the Department of Commerce in conducting reviews and evaluations of its financial assistance programs. For this purpose, applicant information and data may be accessed, reviewed and evaluated by Department of Commerce employees, other federal employees, and also by federal agents and contractors, and/or by non-federal personnel, all of whom enter into appropriate conflict of interest and confidentiality agreements covering the use of such information. As may be provided in the terms and conditions of a specific financial assistance award, applicants are expected to support program reviews and evaluations by submitting required financial and performance information and data in an accurate and timely manner, and by cooperating with Department of Commerce and external program evaluators. In accordance with 2 C.F.R. § 200.303(e), applicants are reminded that they must take reasonable measures to safeguard protected personally identifiable information and other confidential or sensitive personal or business information created or obtained in connection with a Department of Commerce financial assistance award.
